### **DETAILED ACTION**

This office action in response to communication filed on 10/17/05. Claim 27 had been cancelled. Claims 1-26 and 28-30 remain in this application.

#### ***Specification***

The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

#### ***Allowable Subject Matter***

Claims 1-26 and 28-30 are allowable.

The following is an examiner's statement of reasons for allowance: Claim 1 is allowed over the prior art made of record. The prior art considered individually or in combination fails to fairly teach or suggest claimed power amplifier comprising, among other limitations, a novel and unobvious limitations of "second elements separate from the first elements for charging, upon power-on, the decoupling capacitor to a second level set by said reference voltage, wherein the first elements comprise a controllable resistive bridge" structurally and functionally interconnected with other limitations in the manner as cited in claims 2-13.

Claim 14 is allowed over the prior art made of record. The prior art considered individually or in combination fails to fairly teach or suggest claimed power amplifier comprising, among other limitations, a novel and unobvious limitations of "second circuit configured to charge the decoupling capacitor in response to the control signal"

structurally and functionally interconnected with other limitations in the manner as cited in claims 15-25.

Claim 26 is allowed over the prior art made of record. The prior art considered individually or in combination fails to fairly teach or suggest claimed power amplifier comprising, among other limitations, a novel and unobvious limitations of "separately charging the coupling and decoupling capacitors upon power-on from an off or standby state and inhibiting the first and second operational amplifiers during the separate charging" structurally and functionally interconnected with other limitations in the manner as cited in claims 28-30.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

#### **Cited References**

The prior art made of record and not replied upon is considered pertinent to application's disclosures. The cited references relate to instant claim's matter.

#### ***Conclusion***
